Drawn By: JSM

It is predicted that the probability and extent of flood risk will increase over time as a result of climate change. However, detailed assessments are outside the scope of the SMP.

- No active intervention
- Managed realignment
- Hold the line
- Advance the line

Boxes showing cliff erosion estimates represent predicted erosion from the shoreline position in year 0. They are only shown where there is a policy of NAI and cliff erosion is the main risk.

Lines represent the preferred shoreline management policy for each location (most landward line is the first epoch)

Up to 20 years
20 to 50 years
50 to 100 years
